

Description of Work (DOW) for: Project Management Services (SMA6)

1.1 Objectives

The Contractor shall provide Project Management Services to coordinate all tasks, deliverables, and personnel across the Contractor's task orders under the BPA. The objective is to have one overall point of contact to report out to CBO and convey information back to the Contractor and its personnel.

1.2 Scope of Work

The scope of work includes, but is not limited to, the following activities:

- **Project Initiation & Planning:** Collaborating with stakeholders to define needs and objectives.
- **Requirements Gathering:** Translating business requirements into effective technical solutions and implementation plans.
- **Resource & Budget Management:** Assigning tasks to Contractor personnel and forecasting labor burn rate.
- **Execution & Monitoring:** Overseeing daily progress, managing the schedule, and ensuring quality standards are met.
- **Risk Management:** Identifying potential issues and implementing mitigation strategies.
- **Stakeholder Communication:** Acting as a liaison between Contractor technical teams and the COR and executive leadership to manage expectations.

1.3 Key Personnel

The following role is anticipated to be required for this work and is considered Key Personnel, in accordance with SOW paragraph 2.9.

- Project Manager

1.3.1 Key Personnel Requirements

The Contractor shall provide personnel who meet the following specific requirements:

- Must be able to effectively quantify specific, detailed information for their recommendations in written and verbal formats.
- A working understanding of Information Technology (IT) and Cybersecurity capabilities.
- Strong verbal and written communications skills to facilitate clear and concise delivery statuses on multiple, concurrent activities.
- Attention to detail.
- The ability to define requirements and prepare task proposals, to include budget and schedule development.
- Experience with project management tools.
- Experience developing policies, procedures, and work instructions.
- The ability to identify, assess, and mitigate potential technical and other project-related risks.
- The ability to assess project deliverables to help ensure deliverables meet CBO requirements.

1.3.2 Required Credentials

The candidate provided by the Contractor must have the following current credentials:

- Preferred Education: Bachelor's degree in an IT-related field
- Preferred Certifications: PMP or a minimum of 10 years of experience
